I am writing you again in the hope every one of you read the State paper this sobering Sunday morning. The stories about how gov is has harmed residents and families in our State should weigh heavily ..very..on your decision,not governed by wishes of giant utilities ,but needs of citizens hurting badly. I've watched the utility trucks cruise through,waiting to turn off electronic.,Water, sewer,looking for that 're connect fee...as neighbors who are out if work struggle to find money to continue paying bills and buy necessities....this is an unconditionally inconsiderate request from multi million dollar companies who have deep pockets. Weigh your decision carefully...while your people out here are NOT doing ok. BARBARA SUMMERS. GTON...80 and wondering every day..What will go wrong next? Will I be the next to go? Will I get to see my children again ?
